

Vantage Data Centers Enters Into a \$135 Million Revolving Credit Facility

Supports continued growth in California and Washington data center campuses

Santa Clara, Calif., February 15, 2012 - Vantage Data Centers, the leading pure-play wholesale data center developer, announced today that it has entered into a \$135 million revolving credit facility with a premier group of lenders. Vantage will use the funds for accelerated development of data center campuses in Santa Clara, California and in Quincy, Washington.

The lending group includes Royal Bank of Canada as the Administrative Agent, KeyBank, N.A., and Bank of America, N.A. as Co-Syndication Agents, Barclays Bank PLC, Raymond James Bank, FSB and UBS Loan Finance LLC as participants.

“Despite global economic uncertainty our lenders have demonstrated confidence in our business, our commitment to becoming the world’s leading pure-play wholesale data center company and the vision we have crafted with our investors, our employees and our customers,” said Jim Trout, chief executive officer of Vantage Data Centers.

Vantage Data Centers announced completion and leasing of its first Santa Clara data center (V3) in early 2011, followed by rapid lease-up and construction of the industry’s first vertically scalable wholesale data center (V2) in September 2011. V2 has recently been commissioned with an industry leading Power Usage Effectiveness (PUE) of 1.12, making it one of the world’s most energy-efficient data centers.

Vantage’s Quincy, Washington campus is being developed in several phases, starting with a 6MW state-of-the-art, enterprise class data center, scalable to 9MW. This facility will be the first data center to be built on the 63 acre campus.

About Vantage Data Centers

Vantage Data Centers is a privately held company focused on the ownership, development, and operation of highly efficient and scalable wholesale data centers. Vantage provides optimal and flexible data center solutions tailored to the business requirements of the world’s leading companies and service providers. Led by a deeply experienced team of executives, Vantage sets a new standard for innovation, engineering excellence, operational management and complex customer solutions.
